

Bradleys, Incorporated is a very busy, fast growing, industrial electric motor repair shop located in Gregory, Texas. We sell and repair medium and large motors and other rotating equipment used in a variety of local industries and municipalities.

We take pride in the high quality of our employees, which is reflected in the high quality of our workmanship. Our employees are passionate about the work they do and enjoy coming to work because they are challenged by their work; treated with respect, and; they know that their contributions are appreciated.

Electrical Engineer Summary

Full Time, Gregory, TX.

Minimum requirements:

- Bachelor's degree in electrical engineering or related field plus 12 months of experience in electrical engineering.
- Must include working with SCADA, HMI, CAD and Wonderware.

Job Description Overview:

- Provide technical assistance when electrical engineering problems are encountered.
- Set up and operate test equipment to evaluate motor windings and associated components.
- Design engineering specifications and procedures to support training in electric motor related topics.
- Work with Quality Department to conduct inspections and report finding and recommendations to improve assurance programs.
- Work with contractors and vendors in repair, maintenance, purchase, and design of in-shop electrical equipment.
- Review existing electrical engineering criteria to identify necessary revisions, deletions or amendments to outdated material.
- Analyze reports, maps, drawings, tests and other data to plan and design projects.
- Assemble bids, obtain approval, and prepare construction issue drawing packages.
- Review bid analyses and make recommendations.
- Participate in job site visits to collect or deliver design and engineering data.
- Use computer software focused on engineering and design to complete assigned work (CAD, SCADA).
- Confer and assist the Field Service Department when needed.
