

Bradleys, Incorporated is a very busy, fast growing, industrial electric motor repair shop about 15 miles northeast Gregory, Texas. We sell and repair medium and large motors and other rotating equipment used in a variety of local industries and municipalities.

We take pride in the high quality of our employees, which is reflected in the high quality of our workmanship. Our employees are passionate about the work they do and enjoy coming to work because they are challenged by their work; treated with respect, and; they know that their contributions are appreciated.

### **Winding I (Paid Intern) Summary**

Bradleys is looking for a bright, hardworking individual with a high mechanical aptitude and great attention to detail to train to become an electric motor winder/rewinder and mechanic.

This is a fabulous opportunity to learn a valuable new trade in an exciting industry while also getting paid a competitive salary. In this position you will learn how to:

- Measure AC stators, DC field frames and armatures and various AC and DC coils
- Record a motor's internal connections, turns, wire count, wires in hand, wire size, wire span, etc.
- Clean winding cores and prepare them for insulation
- Design insulation systems for winding cores and winding systems
- Manufacture coils from copper to be reinserted into winding cores
- Install various coils into stator cores
- Weld copper connections
- Operate various test equipment to analyze new and old windings
- Much more!

If you are hungry to learn a new trade and just need a chance to prove yourself, this could be the life-changing opportunity you have been waiting for!

This may be a intern position, but we guarantee that your salary will grow at the same rate as your ability.

Sincerely,

Management
